

# IMPLICATIONS OF CURRENT GEOPOLITICAL SHIFTS ON CROSS-BORDER TRANSACTIONS

**PROF. HIKMAHANTO JUWANA, S.H., L.L.M., PH.D.**  
Professor of International Law, Universitas Indonesia

# CURRENT GEOPOLITICAL SHIFTS

- We are witnessing a transition from a single superpower to a robust multipolar world.
- The trend of globalization is giving way to a fragmented global economy.
- Technological competition is escalating and redefining our landscape.

## GEOPOLITICAL SHIFTS PRESENT VITAL NEW ALTERNATIVES THAT WE MUST SEIZE

- Geopolitical shifts present exciting new opportunities for nations worldwide.
- Countries now have the freedom to choose options that optimize their domestic interests.
- The international economy is evolving in response to these significant geopolitical changes.
- We are witnessing a shift away from OECD's influence over the global economy, with BRICS emerging as a powerful alternative.

# INDONESIA'S FOREIGN POLICY

- Indonesia adheres to an independent and active foreign policy
- Indonesia's foreign policy is a strategic framework that reflects the nation's commitment to promoting peace, stability, and prosperity in the region and beyond
- By fostering diplomatic relations and actively participating in international organizations, Indonesia aims to enhance its global standing while advocating for regional autonomy and cooperation
- This approach not only strengthens bilateral ties but also supports the nation's economic and social development goals, ultimately benefiting both Indonesia and its partners in the long run

**President Prabowo  
quotes,**

**“Thousand  
friends too few,  
one enemy too  
many.”**

# Cross-border transaction on Today's Geopolitical Shifts

- There is no clear line dividing "us" from "them"; every country must collaborate effectively.
- Cooperation is crucial for the survival of nations.
- The dominance of superpowers over less powerful countries must end.
- Nations are engaged in fierce competition for market share, and technology will be the key to success.
- Those who cling to outdated technology will inevitably be left behind in this race.

# Thank You
